

Dr. Jackilyn Dang

Over the past six and a half years, Dr. Jackilyn Dang has been at the local dental healthcare forefront, providing compassionate and revolutionary care to Arlington-area patients.

Dr. Dang opened Great Oak Dental in spring 2013 and added a second practice, Legacy Park Dental, nearly five years ago. She and her staff blend outstanding patient service and the utmost in technical expertise into each patient's treatment plan. During a patient's first visit to either office, the staff begins with a comprehensive exam.

They also go over the medical history, existing dental restorations and the patient's current periodontal health. From there, they customize a treatment plan that the patient understands and feels comfortable with.

Dr. Dang, who has practiced dentistry for more than a decade, says she and the entire staff are "dedicated to a professional philosophy that puts the patient first."

To that end, both Great Oak Dental and Legacy Park Dental offer cutting-edge technology. For

example, Dr. Dang offers MTM® Clear • Aligner, which is a virtually undetectable way to align a smile without traditional braces. The surprisingly affordable Clear Aligner uses clear, removable aligners to correct slight misalignments (such as crowding or gaps). Each aligner is custom fabricated, per the treatment plan arranged between the patient and Dr. Dang, to progressively advance teeth into their ideal position, leaving patients with a beautiful smile.

"We also provide other services, such as implants, braces, veneers and bonding, laser dentistry, crowns and bridges, partials and dentures, and general dentistry," Dr. Dang says. "Our goal is to ensure that each patient receives our utmost care, from the very first visit through what we hope will be a long-lasting relationship."

Dr. Dang notes that both practices are taking new patients.

Dr. James Hyde and
Dr. Charles Miller

Drs. Hyde, Miller & Associates

As principal dental health providers at Hyde, Miller & Associates, Dr. James Hyde and Dr. Charles Miller have made it a priority to ensure that each of their pediatric patients leaves the office with a smile on his/her face.

And, because the team at Hyde, Miller and Associates is so good at what it does, those smiles are almost always brighter and healthier than they were prior to the visit.

And the children aren't the only ones smiling.

"Not only is our team fabulous with the children," says Dr. Hyde, "they are just as great in calming the parents' anxiety with the thought of their child not being in their presence. We offer tours of our open bay to any parent that may have reservations about the visit. In explaining the open bay concept over the phone, it can be hard to actually visualize this, so we want to make sure the parents see and understand the process of their child's experience with us."

That experience almost always involves the office mascot, Adam the Alligator, who, in addition to helping patients enjoy their dental experience, visits local preschools and daycares with a member of the team to help promote healthy dental habits. "We present healthy dental resources for the children, as well as the teachers, to help educate on the importance of dental care," says Dr. Miller. "Adam brings each child goodie bags with a new toothbrush, floss and educational flyers for the parents to review."
