

HOME SWEET! HOME

Welcome to the dark side of the rustic force (It's all the rage now!)

Just when you think you have seen every type of farmhouse style in existence, we bring you the sleek and sophisticated dark side. Ebony, onyx, sable, raven, slate ... pick a color any color, just make sure it's dark. This is all the new rage in the modern farmhouse style, and we like it.

It is a refreshing switch from the white and gray to see bold colors inside and out. In addition to the great colors in this new build, notice the genius window placement in the master shower. While windows in the shower are not a new idea, the placement of these particular windows is what makes them unique.

You will also want to make note of the long, linear shampoo niche that is backlit to add innovation to the design. Mixing the new and modern design elements with some of the tried and true, such as the rustic wood beams, is a show stopper in this project. Don't be afraid to step out of the box when it is time for your project.
